

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Sterling Inflation Linked Intermediate Duration Fixed Income Fund Share Class: GBP Accumulation Shares (ISIN: IE00B3PVQJ91)

a sub fund of Dimensional Funds Plc.

Objectives & Investment Policy

The aim is to provide the return of medium-term debt, which is protected from inflation in the United Kingdom.

The fund is managed on a discretionary basis and invests in high quality debt such as bonds, commercial paper and bank debt. This debt is issued by governments, other public bodies and companies from developed countries and, at the time of purchase, this debt is generally rated at least P1, A-1 or F1 short term or AA- or Aa3 long term by the major rating agencies. Generally, the fund will maintain an average duration* of its investments with a range between five and ten years.

* Duration is a measure of the sensitivity of a bond's value to changes in interest rates. Generally, the longer a bond's duration, the more sensitive the bond's value will be to changes in interest rates.

To seek protection from inflation in the United Kingdom, the fund will purchase debt which has its principal and interest payments

adjusted for inflation. The fund may also purchase debt without this inflation protection and then enter into financial contracts or instruments (derivatives) which, when held in combination with this debt, is intended to approximate the performance of inflation linked assets. The fund may purchase debt in currencies other than sterling and, where it does so, will use derivatives to manage the fund's exposure to these currencies.

The fund may use derivatives to manage risk, reduce costs or improve returns.

Income is not distributed and is rolled up (accumulated) into the value of your investment.

You may sell your investment in the fund on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 4 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The fund may enter into various financial contracts (derivatives) with another party. There is a risk that this party will become insolvent or fail to make its payments which may result in the fund and your investment suffering a loss.

The fund may invest in tradeable debt (bonds), the return on which depends on the issuer's ability or willingness to make its payments. There is a risk that the issuer will fail to do so. Although the fund generally invests in bonds with high ratings, these ratings are subjective and a high rating does not guarantee an issuer's ability or willingness to pay.

As interest rates on inflation protected securities are adjusted for inflation, the values of these securities are not materially affected

by inflation expectations. Generally, the value of an inflation-protected security will fall when real interest rates rise and will rise when real interest rates fall. The rate of return on the investments of the fund may not fully match the rate of inflation over the same period.

The fund may use derivatives in an attempt to reduce risk (hedging) or for investment purposes. Derivatives can be a risky asset. They can be subject to risks such as counterparty, liquidity, interest rate, market, credit and management risks and improper valuation. The fund, in turn, may be affected by this and the share price may fluctuate, which may result in a loss to the fund.

Bonds are interest rate sensitive, meaning that the range and frequency of price movements of the bonds may be significant due to various factors, including changes in interest rates, the creditworthiness of the bond issuer and the ease with which similar investments may be bought or sold (liquidity).

Where the fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the fund and the fund could lose more than the amount invested.

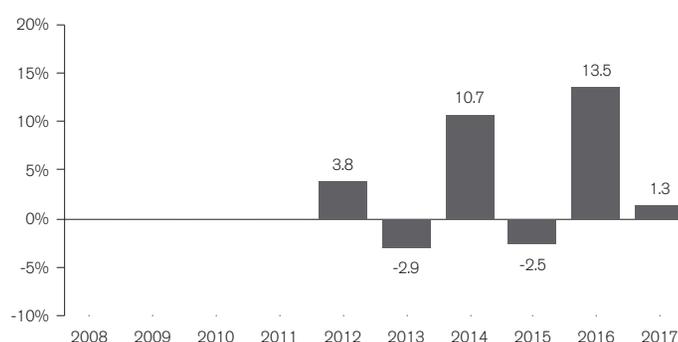

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		<p>The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser or distributor.</p> <p>The ongoing charges figure is based on expenses for the year ending November 2017. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.</p> <p>More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.</p> <p>No conversion fee will be charged by the fund or the investment manager.</p>
Entry charge	None	
Exit charge	None	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		
Charges taken from the Fund over a year		
Ongoing charges	0.21%	
Charges taken from the Fund under certain specific conditions		
Performance fee	None	

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2011 and the share class was launched in 2011.

Past performance has been calculated in GBP.
